

VISION

The Massachusetts ICC will advise and assist the DPH through active collaboration and engaged participation of all members in order to optimize and sustain a comprehensive birth to three system. As a result the Commonwealth will have a community based system of care that maximizes opportunities for all children and families.

MISSION

The mission of the Massachusetts Interagency Coordinating Council ICC advises and assists the Massachusetts Department of Public Health in planning, development and implementation of Early Intervention inclusive of the comprehensive birth to three system.

Family Centered

The ICC will respect and address the diversity of the families served.

Parents are regarded as the primary decision-makers for their families in the collaborative process of individualized service development and delivery.

Community Based

The ICC will promote interagency collaboration and coordinating in all areas, such as training, program development and implementation.

Parent/Professional collaboration will occur at all levels of state and local service planning, training and evaluation of programs, the early intervention system and policy development.

Quality

The ICC will promote current research and developmentally appropriate practice.

Equal access to and the availability of quality early intervention services throughout the state.

Sustainable

The ICC will support a skilled workforce and financial resources for the implementation of the EI system.

Adequate state, federal and other support of the EI system.

IMPACTFUL AND ENGAGED

LEADERSHIP AND INNOVATION

INCLUSIVENESS AND COLLABORATION
